

Fridays 1-2 pm | Eastern Avenue Lecture Theatre

JULY	29	Prof Ian Small – <i>The University of Western Australia</i> Discovering and designing on-off switches for translation in mitochondria and chloroplasts Hosts: Joel Mackay & Min Chen
<hr/>		
AUG	5	Prof Ruth Hall – <i>SOLES Microbiology</i> The path to extensive and pan antibiotic resistance in Gram negative bacteria Host: Andy Holmes
	12	Prof Vanessa Barrs – <i>SOLES Animal Sciences</i> Fungal pathogens in animals and humans and the spectre of emerging antifungal resistance Host: Claire Wade
	19	Dr Ann Kwan – <i>SOLES Biochemistry, Cellular & Molecular Biology</i> All about hydrophobins: a family of unique and multi-purpose proteins from fungi Host: Jacqui Matthews
	26	Prof Liz Isenring – <i>Bond University</i> An update on ginger for the relief of nausea Host: Margaret Allman-Farinelli
<hr/>		
SEPT	2	A/Prof Brent Kaiser – <i>SOLES Plant Sciences</i> Legumes for sustainable agriculture Host: Peter Sharp
	9	A/Prof Bryan Fry – <i>The University of Queensland</i> The Evolution of Venom Host: Camilla Whittington
	16	Dr Tanya Latty – <i>SOLES Ecology, Evolution & Environmental Sciences</i> Insect behaviour and ecology Host: Madeleine Beekman
	23	Prof Martin Westwell – <i>Flinders University</i> The teaching of science and the science of teaching Host: Joel Mackay
<hr/>		
MID SEMESTER BREAK (26/9/16 - 30/9/16)		
<hr/>		
OCT	7	Dr Peter Czabotar – <i>Walter and Eliza Hall Institute of Medical Research</i> How do cells die? Host: Joel Mackay
	14	A/Prof Mark Dawson – <i>Peter MacCallum Cancer Centre</i> Cancer epigenetics Host: Joel Mackay
	21	Prof Lisa Matisoo-Smith – <i>The University of Otago</i> Molecular Anthropology Host: John-Sebastian Eden
	28	Dr Kate Schroder – <i>Institute for Molecular Bioscience at UQ</i> Inflammation control by inflammasomes Host: Iain Campbell
<hr/>		
STUDY VACATION COMMENCES 31/10/16		
<hr/>		
NOV	4	Prof Robert Dunn – <i>North Carolina State University (Murray Lecturer)</i> Using ecology and evolution to speed applied discoveries: lessons from caviar, beer, and biofuels
